Leonardo Florentino

Tech Lead | Software Engineer | Python Back-End Developer
São Paulo, Brazil

Summary

Hello! I'm Leonardo, a seasoned Python Backend Developer and
an enthusiastic technologist with a passion for creating innovative
solutions. I hold a Bachelor's degree in Computer Science and
I'm based in Brazil. My professional journey has been marked by
successful stints as a Developer, Project Director, Infrastructure
Analyst, and a business owner.

Throughout my career, I've gained extensive experience in
developing CRM solutions, integrating systems, managing and
structuring data warehouses, leading teams, and automating internal
processes. I thrive in both startup and corporate environments,
continually seeking challenges that foster growth and innovation.

I've honed my skills using a variety of tools, including but not limited
to Python, FastAPI, Lambda, S3 Bucket, DynamoDB, MySQL with
SQLAlchemy, and API development.

Now, I am seeking to bring my technical expertise and leadership
skills to an innovative, global team. I'm open to opportunities abroad,
eager to contribute to projects that push technological boundaries,
and passionate about continual learning in the ever-evolving field of
technology.

To get a glimpse of my work, you can visit:

Personal Website: https://leonardomarcao.com
Medium: https://medium.com/@leonardo.marcao
GitHub: https://github.com/leonardomarcao

Feel free to connect or send a message if you believe my expertise
could be valuable to your team, or if you're interested in discussing
how technology can transform businesses. I look forward to possible
collaborations and discussions. Let's innovate together!

Experience

Motor Hero
Tech Lead
January 2024 - Present (1 year)
São Paulo, Brasil

- I implemented new technologies to optimize internal processes and promoted a culture of continuous innovation.
- I planned strategies to support the growth of the user base, ensuring high availability and resilience of applications.
- I adopted sustainable IT practices to reduce costs and environmental impacts.
- I developed a work environment that promotes professional growth and job satisfaction.
- I aligned technology projects with the company's strategic objectives and prioritized initiatives with the greatest impact on the business.

Omie
Python Backend Developer Senior
April 2022 - December 2023 (1 year 9 months)

Currently, I am working on developing an in-house CRM product designed to increase our company's sales. I have contributed significantly by:

Developing a multitude of features for the CRM, such as integrations with phone, WhatsApp, and email services. These integrations have greatly improved our ability to track the performance of our salesforce and to assist them in communicating with clients.
Developing a comprehensive bureau that includes data from all Brazilian companies. This invaluable tool assists our sales team in prospecting new clients.
In addition, I have had the unique opportunity to simultaneously participate in two squads, which has significantly expanded my experience and skill set.

Tools used: Python, FastAPI, Lambda, microservices, S3 Bucket, DynamoDB, MySQL with SQLAlchemy, and API development, among others.

TCL Soluções
Full-stack Developer Senior
September 2021 - April 2022 (8 months)

- Oversaw a Due Diligence process, focusing on comprehensive analysis and system enhancements;
- Assisted in the development and improvement of new and existing ERP functionalities;
- Initiated and implemented solutions for application/routine monitoring, and error tracking due to system failures.

Tools used: .NET Framework, ASP.NET Framework, .NET Core 3, ASP.NET Core 3, .NET 5, .NET 6, SQL Server, Windows Server, ISS, and Azure DevOps.

Risknow.ai
Python Backend Developer Plenary
August 2020 - September 2021 (1 year 2 months)

- Created and developed microservices to enhance system functionality;
- Established and evolved ETL processes to address anomalies and data normalization issues;
- Led the development of a new version of the company's ETL system;
- Collaborated with the big data team to analyze and extract customer data, thereby enabling insightful analysis and effective KPI generation.

Tools used: SQS, DynamoDB, S3, Lambda, Sanic Framework, MongoDB, and Pandas.

Blue3
Full-stack Developer Plenary
June 2019 - August 2020 (1 year 3 months)
Ribeirão Preto, São Paulo

- Responsible for automating internal processes for optimization of time, human resources, and expenses;
- Developed microservices for CRM integration;
- Structured a data warehouse and data loading flow;
- Planned, diagrammed, and created data loading flow via ETL;
- Developed managerial dashboards to assist in decision-making;
- Analyzed and gathered requirements, set deadlines, and led a team.

Tools used: Python, Django, PostgreSQL, Celery, Redis, Odoo Community, Pandas, Oracle APEX, Oracle DBMS, Pentaho.
